

Save energy, money and the environment

As Retail Council of Canada (RCC) continues with its commitment to drive the message of sustainability through the retail industry and assist retailers in their quest to reduce their energy consumption and costs, the association calls on merchants to sign up now for the many energy retrofit incentives that are still available through the association's partnership with Nova Scotia Power.

Are you looking to increase energy efficiency and save money at your business?

The Business Energy Rebates program allows you to find cost-effective ways to reduce electricity use at your business and save you money. Financial rebates and 0% interest on-bill financing are available for eligible products in the following categories:

- LED retrofits of track/spot lighting and refrigerated cases – **NEW!!**
- Lighting
- Motors & variable speed drives
- Refrigeration
- Compressed air equipment
- Commercial Central Heating & Cooling (HVAC) products

To be eligible for the rebate:

- Equipment must be new and installed in a non-residential facility or in common areas of a multifamily building.
- Products purchased must be from the approved products list. Visit www.nspower.ca/businessenergyrebates for a full list of eligible products and application forms
- Eligible products include lighting, motors and variable speed drives, HVAC, refrigeration and compressed air equipment.

Rebate approval:

- Only energy efficient products listed on the NS Power website are eligible for rebates.
- Applications with rebate totals:
 - up to \$2,000 do not require pre-approval before products are purchased to qualify for rebates.
 - over \$2,000 must be pre-approved by NS Power before products are purchased to qualify for rebates.
