- **Retail Trend Numbers:** Statistics Canada has a method that they report online for calculating trend numbers. RCC adds that trend calculation to its numbers.
- **Core-Retail Sales:** This category captures the types of retail sales most common among RCC members. Specifically, Core-Retail removes gasoline station and motor vehicle and parts sales from total retail sales by subtracting Statistics Canada NAICS 447 and 441 from NAICS 44-45.

1 | NATIONAL HIGHLIGHTS

Retail Sales Numbers

(updated monthly)

June 2020 Canadian retail sales were up 23.72% from May. With a year-over-year increase of 3.79%, they are reason to be cautiously optimistic that the sector is recovering from Covid-19. The clothing and accessories sector was the only sector we track that did not see a positive YoY increase, but it still saw by far the largest monthly jump at 142.32%. Pent-up consumer demand after lockdown may have been a contributing factor to these positive June results. Sales for July and August 2020 will shed light on whether demand continued at such levels.

Canadian core retail sales rose by 7.75% in June 2020 compared to 2019.
